What is a profession?

- Personal service
- Public practice
- Essential
- Mastery of complex intellectual skill
 - long apprenticeship
 - continuing education
- Objectively correct
- Priority of public interest

April 19, 2010 Dianne Saxe

In other words --

An occupation requiring <u>specialized abilities</u> on an <u>intellectual</u> rather than a manual level;

A relationship of <u>trust and confidentiality</u> between practitioners and clients or employers;

An obligation to put the <u>public interest above all else</u> in exchange for the <u>privilege of a protected right to practice</u> and self-regulating status;

A <u>common heritage</u> to which it is expected all members of the profession will contribute;

A bond among practitioners, embodied by a <u>code of ethics</u> and <u>professional conduct</u>, to <u>protect the public from harm</u> by ensuring that they and their professional colleagues practice competently and with integrity.
